Made here.

For practices here.

One system, connected and compliant, built around how a practice works.

A profile that represents you.

Everything a patient needs to choose you.

Booking you customise.

A schedule you control.

Shape booking around each service, and decide how your day, week and month run.

Documentation, by dictation.

Speak as you consult, and the transcript lands straight in the chart.

Show more slots

Booking you customise. A schedule you control.

Booking is more than picking a slot. Patients see your real availability and book directly — and if you choose, they answer your intake questions and read your instructions first. You walk into the consultation already knowing why they came.

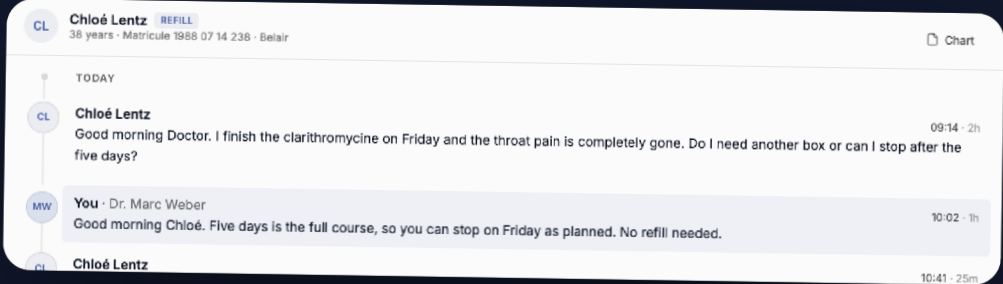

Your day, on your terms.

A calendar and schedule that keep you in full control of your time. One location or several, alone or with a team — the practice keeps the rhythm you set.

Fewer interruptions.

Patient requests and questions reach your inbox without interrupting your consultations, and you answer when you're available. You decide who can write to you, and whether patients can reply.

Documentation, by dictation.

Speak as you consult, and the transcript lands straight in the chart.

The screenshot shows a digital medical chart interface. It features two main sections: 'SOAP NOTE' and 'DIAGNOSIS'. The 'SOAP NOTE' section contains text about a sore throat and a prescription for Clarithromycin, with an 'Add' button below it. The 'DIAGNOSIS' section contains text about acute tonsillitis and a status indicator 'Added'.

SOAP NOTE
Mal de gorge depuis 4 jours, aggravé à la déglutition · Angine aiguë, probablement bactérienne · Clarithromycine 500 mg, 2 x/jour, 5 jours
[Add](#)

DIAGNOSIS
Angine aiguë, non précisée (J03.9)
✓ Added

Compliant, and handled.

Ordonnances, sick-leave certificates and the mémoire d'honoraires come straight from the patient's chart, in just a few clicks.
